Getting More Srt Diamond

Cluster setting: This engagement ring setting places several small diamonds of similar size next to each other. This technique maximizes sparkle and gives the illusion of a single diamond that is much larger in size (and more costly) than the melee diamonds used to make it.. TIP: Diamonds of the same or similar color grades work best in a cluster setting.

Engagement Ring Settings to Make Your Diamond Look Bigger

Bezel. After the prong setting, the bezel setting is the next most popular choice for consumers. A bezel setting holds the diamond by surrounding it with a metal rim, creating more security and a very modern look. They are especially great for people with a very active lifestyle because they keep the diamond so secure.

How to Set a Loose Diamond - Brilliance.com

The diamond goes through many stages as it transforms into jewelry. One of these stages which requires labor and mastery is the installation of the stone, that is, the setting process. Goldia.com will educate you about the types of setting options and and their requirements with this informative article. The diamond jewelry production, which started with the exodus of the diamond, is a very high laborious and expertise demanding mastery that needs to be done by qualified setters.

Position the stone close to your mouth and breathe onto the flat surface of the diamond. Imagine you are breathing into a mirror to make it foggy. Diamonds immediately dispense heat, so instead of remaining cloudy, the diamond would become instantly transparent. Try this same test on cubic zirconia. The surface of the CZ will continue to be foggy.
